

Missions for budding bioblitzers...

Mission 5 : Can you find these plants and trees in the hedges? (if you do, just put a tick in the box below the picture, don't pick the leaves)

Blackthorn

Field Maple

Ash

Willow

Elm

Elder

Did you know that you can guess how old a hedge is by counting the number of woody species along a 27 metres stretch? Each type, or species, equals 100 years in age! This is called "Hooper's Rule".
